

360° REGIONAL NERVE BLOCKS FOR HIP

ADVANCED ULTRASOUND-GUIDED
APPROACHES FOR HIP ANALGESIA

DR. AZAM DANISH

DR. NABIL ELKASSABANY

Understand the anatomy. Visualize the nerves. Master the block.

AORA 2026 | GARC 2026

16 – 19 JULY 2026

WHY THIS MASTERCLASS?

-  Comprehensive understanding of hip innervation
-  Ultrasound-guided regional anaesthesia techniques
-  Landmark identification with live imaging concepts
-  Practical needle approaches for hip blocks
-  Learn to interpret sonoanatomy with precision and confidence.

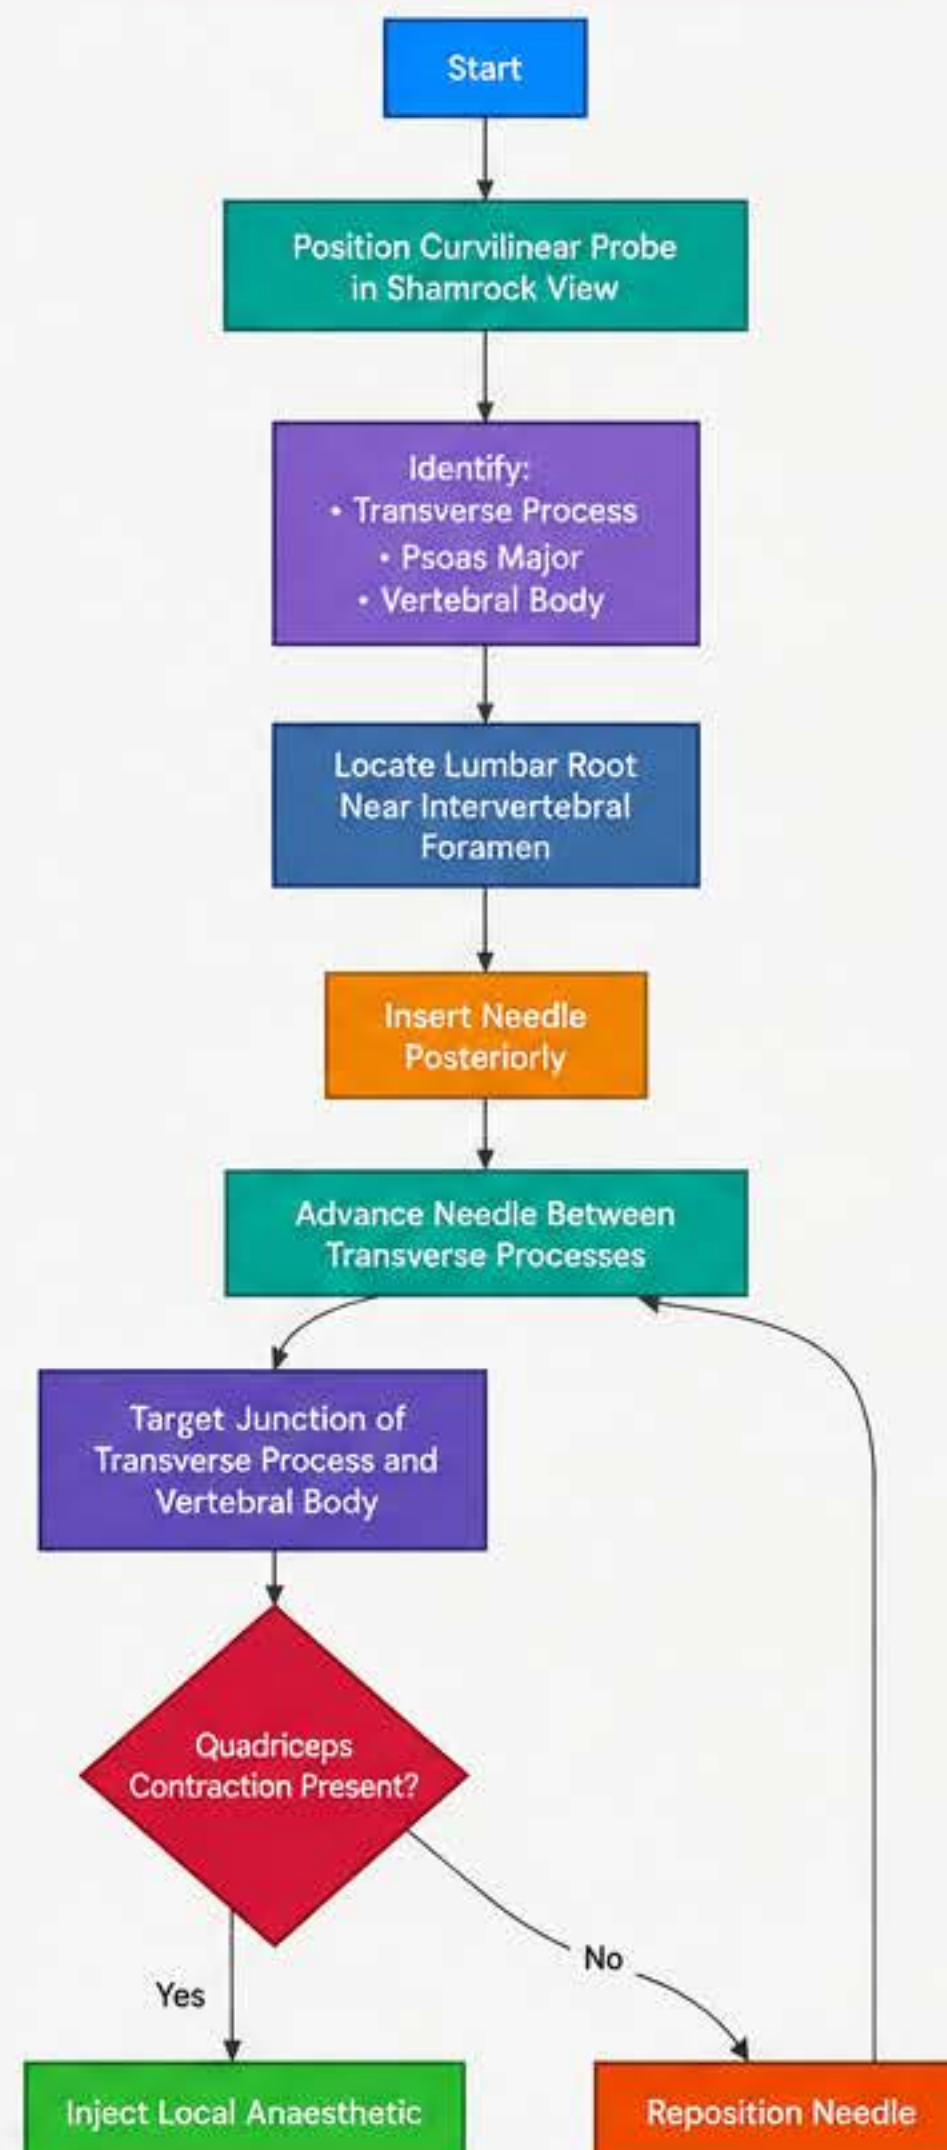

WHAT YOU WILL LEARN

TOPICS COVERED

- Anatomy of hip joint innervation
- Lumbar plexus block techniques
- Fascial plane approaches around the hip
- Needle trajectory optimization
- Ultrasound image interpretation
- Safety considerations and troubleshooting

STEPWISE APPROACH TO LUMBAR PLEXUS BLOCK

ABOUT THE MASTERCLASS

A focused 90-minute journey to master the anatomy, sonoanatomy, and ultrasound-guided techniques for regional nerve blocks around the hip.

WHO SHOULD ATTEND?

-  Anaesthesiologists
-  Regional anaesthesia enthusiasts
-  Postgraduate trainees
-  Pain physicians
-  Fellowship candidates

HIGHLIGHTS

- ✓ Practical approach
- ✓ Image-based learning
- ✓ Clinically relevant anatomy
- ✓ Rapid high-yield revision
